

CRT SCREEN CARE

An anti-fog, anti-static, micronic cleaner and protective coating specially formulated to improve visual imaging of computer monitors and television screens. Reduces eye fatigue by reducing surface distortion, eliminating dust attraction and providing a clear, clean field of vision.

USE ON: Computer Display Terminals, Television Screens, Electronic Game Screens, Tracking Station Screens, Radar Screens, Instrument Chart Covers and Screens, Safety Masks, Face Shields and Visors.

DIRECTIONS: Unique 360° valve allows spraying in upright or inverted positions. Shake well before application. Spray from a distance of 6 to 8 inches. If surface is dirty, use first application for cleaning, then re-apply thin coating for protection. Wipe with a lint-free cloth, then polish or buff. Extra coats will give more protection. For best results, use daily.

PRECAUTIONS: Not recommended for optically coated glass screen filters or textured mesh screens.

MADE IN THE
U.S.A.

CAUTION: Contains Isopropyl Alcohol (67-63-0) and Liquefied Petroleum Gas (68476-86-8). Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120°F. Do not spray on food or feedstuffs.

For further information consult
Material Safety Data Sheet.

**KEEP OUT OF REACH
OF CHILDREN**
