

CONTAINS NO CHLORINATED SOLVENTS • NO CFC's

ANTI-STICK TREATMENT FOR LAWN MOWERS AND BUSH HOGS

A unique pre-mowing non-stick treatment for the underside of Lawn Mower and Bush Hog decks. Reduces sticking and buildup of grass clippings, weeds and dirt. Specially formulated with high tech polymers that reduce grass adhesion to the under-surfaces of all types of mower decks and lawn maintenance equipment. Helps keep blades, flails and blade housings free from clogs and grass build-up. Reduces horsepower requirements, fuel consumption, corrosion and equipment wear. Regular use helps blades and cutting edges remain sharper longer. When used prior to mowing, in conjunction with scheduled cleaning and regular equipment maintenance, reduces costly equipment failure and repairs.

SAFE ON ALL MOWER DECK SURFACES: Metal, Painted Metal, Plastic, Fiberglass and Rubber. Also great for use on edge trimmers, hedge trimmers, weed eaters, rototillers and all other lawn maintenance equipment to which grass or trimmings may stick.

DIRECTIONS: NOTE: To prevent accidental Injury, turn off engine and disengage or disable cutting blades before pre-cleaning or application of product. Prior to initial application, thoroughly clean all under-surfaces of mower deck and blades with strong water stream or pressure washer. Allow cleaned surface to air dry. For best results: Apply product onto clean dry surfaces only. Spray liberally in a sweeping motion over entire underside of mower deck. Treat all blades, rollers, housings, covers, flails, chutes and guide wheels. Allow treatment to dry for approximately 5 minutes before equipment use. Periodically during equipment use and prior to storage, rinse clippings free with a garden hose or pressure washer. Allow equipment to air dry. Reapply treatment frequently to insure peak non-stick performance.

SNOW PLOW WAX

A special blend of silicone and wax that provides a slick, non-stick coating that prevents ice and snow from sticking to plows, shovels and other snow removal equipment. Treated surfaces also become water and rust resistant. The coating provides superior release action and lubrication to reduce drag and sticking of many materials to metal and other surfaces.

Spray on snow removal equipment to keep snow and ice from building up on blades, mold boards and wings. Also excellent for use on road signs to keep snow or ice from sticking and allow for easy readability. Helps increase the efficiency of snow removal, material handling, turf maintenance and road equipment. In Springtime, spray on blades and under decks of grass cutters and mowers to keep grass from sticking to blades and undercarriage. Lessens drag and increases work efficiency!

DIRECTIONS: SHAKE WELL BEFORE USING. Spray surface from a distance of 12 to 14 inches. Allow a moment for wax coating to set up before putting equipment into operation. After use, invert can and spray a short burst to clear valve.

DANGER: Contains Hexane (110-54-3), Liquefied Petroleum Gas (68476-86-8), and Aliphatic Petroleum Distillates (64742-89-8). Use only in a well ventilated area. Avoid contact with eyes or prolonged contact with skin. Do not puncture or incinerate container. Do not expose to heat, sparks or open flame. Do not store at temperatures above 120°F.

FIRST AID: IF EYE CONTACT: Flush with large amounts of cool running water for at least 15 minutes while holding upper and lower lids open. If irritation persists seek medical attention. **IF SKIN CONTACT:** Wash with soap and water. If irritation persists seek medical attention. **EXCESSIVE INHALATION:** Remove to fresh air. Seek medical attention immediately. If breathing stops give artificial respiration. **IF INGESTED:** Do not induce vomiting. Seek medical attention immediately.

ALL SEASON WAX

16511

A special blend of silicone and wax that provides a slick, non-stick coating

Helps Blades Stay Sharp Longer

**Anti-Stick Treatment for
Lawn Mowers and Bush Hogs**
Prevents:

- Grass Build-Up • Clogging
- Sticking • Corrosion
- Unnecessary Wear

**Keeps Snow from Sticking
to Snow Removal Equipment,
Plows, Shovels and Blades**

Protects:

- Metal • Fiberglass
- Painted • Plastic Finishes

**DANGER: EXTREMELY FLAMMABLE.
VAPOR HARMFUL.
CONTENTS UNDER PRESSURE.
